

CET Electrical Tapes

CET electrical tapes offer a true, competitively priced option for premium quality electrical tapes from a well-established supplier of cable accessories. Certified to UL and CSA standards, these electrical tapes provide professional-grade and general-purpose electrical insulation and electrical protection up to 600V. This includes specialty tapes used for environmental sealing, fireproofing, corrosion protection and mechanical protection.

All CET electrical tapes are designed to work in conjunction with DSG-Canusa cold-shrink and heat-shrink cable accessories for a broad range of electrical products and kits.

The chart below highlights available CET tape options, their applications, standards and operating temperatures.

Product	Description	Application	Standards	Operating Temperature °C
CET 33	All weather, professional grade electrical vinyl tape	Primary insulation for splices up to 600V	UL 510 CSA C22.2 No. 197	-18 to 105
CET 35	Professional grade electrical vinyl tape	Color coding, marking and insulation of splices to 600V	UL 510 CSA C22.2 No. 197	-18 to 105
CET 50	Pipe corrosion protection tape	Protection of pipes, conduits, joints and couplings	Federal Spec L-T-1512A	
CET 77	Linerless, elastomeric fireproofing tape	Arc and fire proofing of high-voltage cables and splices	ConEd EO 5343-14 for flammability and tidewater resistance	
CET 88	All weather, heavy duty, electrical vinyl tape	Primary insulation for splices up to 600V and cable rejacketing	UL 510 CSA C22.2 No. 197	-18 to 105
CET 130 C	Linerless EPR, self-bonding high voltage tape	Insulating and jacketing cable splices from 600V to 69kV	HH-I-553C	90 - continuous 130 - emergency
CET 1700	General purpose, economy grade vinyl tape	Primary insulation for splices up to 600V	UL 510 CSA C22.2 No. 197
